

SUNTUF®

SUNTUF® profiled polycarbonate sheet is an outstanding roofing material that offers superior physical properties.

- First Polycarbonate roof in Australia
- First to introduce lifetime warranty
- Suntuf® has been proven over 25 years under Australian conditions
- 99.9% UV protection

SUNTUF® SOLARSMART™

SolarSmart™ reflects more heat across the entire ultraviolet light spectrum, not just the portion that provides visible light.

Near infra-red radiation from the sun is invisible to our eyes but contains large amounts of heat that we feel on our skin. SolarSmart™ is unique in its ability to block out near infra-red heat radiation. Hold up a sample to the sun or to an ultraviolet lamp and you will feel the SolarSmart™ difference.

Handling and Storage

- Store sheets on a flat surface in a well-protected and shaded area out of direct sunlight.
- Sheets stacked / stored in the sun will be affected by heat build-up and possible distortion. Any damage caused by this will void the warranty.
- Take care to avoid moisture build up between stored sheets which can cause possible whitening of the sheets.
- Ensure sheets are free from any chemical, paint solvents and sealant contact (including silicone type products) as these type of products are incompatible with polycarbonate sheeting.
- Sheets may be cleaned with warm soapy water and a soft sponge. Hose down thoroughly – ensure all possible safety precautions are taken.

Product Warranty

- Lifetime Warranty against loss of light transmission
- Lifetime Warranty against UV affected colour distortion
- Warranty against hail damage
